

IN THE SPECIFICATION:

A1 After the title and before the first paragraph, please insert -- THIS APPLICATION IS A U.S. NATIONAL PHASE APPLICATION OF PCT INTERNATIONAL APPLICATION PCT/JP00/00782--.

Please enter the substitute specification as attached hereto. Also enclosed is marked-up copy of the substitute specification showing additions and deletions.

09913614.120501
T05021.660
Please replace the paragraph beginning at page 1, line 5 with the following:

A2 The present invention relates to an information forwarding device, an information forwarding system and method, a management device and a program recording medium which search for information such as reservation information for karaoke or TV programs, reservation information for train tickets and reservation information for lodging in a hotel with a terminal device so as to carry out the reservations.

Please replace the paragraph beginning at page 4, line 18 with the following:

A3 The present invention of the first group has the purpose of providing a terminal device, an information forwarding system and method, a management device and a program recording medium which can carry out a one sequence procedure from the information search to the apparatus control with one apparatus taking into consideration the above described problem wherein the user cannot make a reservation for something or cannot control an apparatus by using the desired information gained by the user through the use of a information communication apparatus.

Please replace the paragraph beginning at page 5, line 3 with the following:

A4

To achieve the above object, one aspect of the present invention is an information forwarding system characterized by comprising:

Please replace the paragraph beginning at page 5, line 18 with the following:

A5

Another aspect of the present invention is an information forwarding system according to said 1st invention, characterized in that:

Please replace the paragraph beginning at page 6 line 2 with the following:

A6

Still another aspect of the present invention is an information forwarding system characterized in that:

Please replace the paragraph beginning at page 6, line 14 with the following:

A7

Yet still another aspect of the present invention is an information forwarding system, characterized in that said output means transmits said designated contents to said supply device and said supply device supplies said designated contents to be supplied when said terminal device closely approaches said supply device.

Please replace the paragraph beginning at page 6, line 21 with the following:

A8

Still yet another aspect of the present invention is an information forwarding system, characterized in that:

Please replace the paragraph beginning at page 7, line 6 with the

following:

A9 A further aspect of the present invention is an information forwarding system, characterized in that said terminal means is a portable body.

Please replace the paragraph beginning at page 7, line 10 with the following:

A10 A still further aspect of the present invention is an information forwarding system, characterized in that said search means carries out a search based on a feeling or sensibility word, which is an adjective, as well as feeling or sensibility information, which shows the degree of the feeling or sensibility while attribution values for carrying out a search based on the feeling or sensibility information are stored in said data base.

09913614 120501
A11 Please replace the paragraph beginning at page 7, line 19 with the following:

A yet further aspect of the present invention is a terminal device characterized by comprising:

Please replace the paragraph beginning at page 8, line 6 with the following:

A12 A still yet further aspect of the present invention is a terminal device, characterized in that said search is a search based on a feeling or sensibility word, which is an adjective, and feeling or sensibility information, which shows the degree of the feeling or sensibility, while attribution values for carrying out a search based on the feeling or sensibility information are stored in said data base.

Please replace the paragraph beginning at page 8, line 14 with the following:

A13

An additional aspect of the present invention is a terminal device, characterized in that said supply device carries out an operation of supplying a tangible entity.

Please ~~replace~~ the paragraph beginning at page 8, line 19 with the following:

A14

A still additional aspect of the present invention is a program recording medium characterized by storing a program for allowing a computer to implement all of, or a part of, the functions of each component of a terminal device or an information forwarding system.

Please ~~replace~~ the paragraph beginning at page 9, line 8 with the following:

A15

A yet additional aspect of the present invention is an e-mail preparation device characterized by comprising:

Please ~~replace~~ the paragraph beginning at page 9, line 21 with the following:

A16

A still yet additional aspect of the present invention is an e-mail preparation device, characterized in that said added data comprise predetermined attributions.

Please ~~replace~~ the paragraph beginning at page 9, line 25 with the following:

A17

A supplementary aspect of the present invention is an e-mail preparation, characterized by further comprising an added data display means of displaying added data which become candidates from said storage means in accordance with said predetermined attributions which are indicated, wherein said selection means selects specific added data, from among said added data, which become candidates.

Please replace the paragraph beginning at page 10, line 8 with the following:

A18
A still supplementary aspect of the present invention is an e-mail preparation device, characterized in that said synthesizing means synthesizes said document data and said specific added data based on editing symbols used by said document data preparation and editing means for editing document data.

09013614-120501
A19
Please replace the paragraph beginning at page 10, line 15 with the following:

A yet supplementary aspect of the present invention is an e-mail preparation device, characterized in that said synthesizing means synthesizes said document data and said added data based on a synthesizing symbol used by said document data preparation and editing means for a synthesis.

Please replace the paragraph beginning at page 10, line 21 with the following:

A20
A still yet supplementary aspect of the present invention is an e-mail preparation device, characterized in that an indication of said predetermined attributions on a screen is carried out at a position designated by said synthesizing symbol.

Please replace the paragraph beginning at page 11, line 2 with the following:

A21
Another aspect of the present invention is a program recording medium characterized by recording a program for allowing a computer to implement all of, or a part of, the functions of each means of an e-mail preparation device.

Please replace the paragraph beginning at page 22, line 17 with

the following:

A22

09913614-120501

Fig 1 is a system configuration diagram of an information forwarding device and method which is the first embodiment. In Fig 1, an information input means, which allows at least one, or more, inputs from among input of letters, selection of information or input of commands, such as an implementation, is denoted as 1, an information display means, which displays information inputted by means of the information input means 1 and which displays the research result by means of a search engine 4, is denoted as 2, a data base, which stores data that are the objective of a search, is denoted as 3, a search engine, which searches for information that agrees with the search conditions inputted by said information input means 1 from said data base 3, is denoted as 4, an information storage means, of storing search results by said search engine 4 or information that specifies the search result information in a unique manner, is denoted as 5 and an information output means, of outputting information stored in said information storage means 5, is denoted as 6.

Please replace the paragraph beginning at page 68, line 2 with the following:

A23

In the present embodiment, since the text data are used in the illustration, it is possible to edit the body of the e-mail and the illustration on the same editing screen and in a plain text format. Here, Fig. 30(b) shows the condition where the editing is completed in a form where the illustration and the body of the document are mixed on the e-mail preparation screen 325.

Please replace the paragraph beginning at page 101, line 6 with the following:

A24
Cm.T

Here, the document data preparation and editing means according to the claims corresponds to the document preparation means 302 in the present embodiment, the added data storage means according to the claims corresponds to the illustration storage means 303, the added data selection means according to the claims corresponds to the illustration search means
